TITLE : LIQUID CRYSTAL DISPLAY DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To reduce the residual image generated when a dynamic image is displayed in a liquid crystal display device.

SOLUTION: In addition to a switching element 12 for write signal application to a liquid crystal picture element, a second switching element 14 for black signal application is provided in parallel thereto. The second switching element 14 is selectively ON to supply a black signal from a black signal supplying part 7 to the picture element 11 through a black signal feed line 8, and the erasing (reset) of write signal is performed.
